Subject: Thank you!

Joe,

I just wanted to send you a thank you on behalf of my Entrepreneurship classes and the FBLA. We purchased your MAX system last year and we have thoroughly enjoyed using it and greatly benefited financially from it.

One reason I love it is because the students get to participate in the design and production. They really enjoy the process and love seeing the end result. Another reason is all the money we have made. Just the other night we worked the Male football team fish fry and we had people lined up for two hours. We couldn't make them fast enough. We made over \$500 in 2 hours! It is a great product and we look forward to getting to sell them through the years to come. It is nice to sell something other than candy and brochure products.

You all have also been so helpful whenever I had questions or needed help. Larry made a couple of trips over in the beginning to make sure we understood how to use it and the other day when I was in the office picking up more vinyl, Ross installed some great new graphics on my laptop for us to use.

Thanks again for a great product!
