Dear Mr. Powell:

We have just recently purchased the Max Graphics System and already the kids are loving the system! Student Hillary Hayes says "It's fun and doesn't limit my creative artistic abilities!"

I am a business teacher at Livingston Central High School. We are utilizing the system in our Career and Technical Education department. Currently, my MultiMedia class is learning the wide variety of uses for the vinyl.

Working with our Community Education Director, we are planning a Service Learning Project. Each of our county schools has a pep rally to encourage the students to do their best on the state tests. We hope to get items donated from local businesses to be given away at these CATS Pep Rallies. To show appreciation to the businesses, we will create vinyl window decals for them to display on their store windows. "We support Livingston County Schools!"

Cathy Davis first presented the system to us in the fall. We immediately knew our school system needed this and worked hard to find the money! Cathy did a great job of not only presenting the Max Graphics System to us, but also in training us. She was a pleasure to work with.

Sincerely,

Greta Ramage
