"Celebrating 30 years of the CAT"

Since the purchase of the Max Graphic System, we have used it during our county basketball tournament to produce immediate vinyl decals that had the county championship team and were personalized. Every member of the team purchased one of these. We had so many people in line, I had to take names and numbers of players and they picked them up the next day.

We made about \$300 in 15 minutes.

We will be using the system during Park and Recreation basketball to make personalized vinyl decals for their players and the county champions. As a basketball coach for the Upward program, I am creating and purchasing individual ones for my team members.

Every year we spend \$600 or more in purchasing vinyl signage for our students that scored proficient or distinguished on past state tests. Unfortunately, the company that did this for us is no longer in operation. With this system, we can now create these ourselves by just purchasing the supplies.

On a side note: Our 8th grade students decided that they wanted the theme of their 8th grade dance to be "Willy Wonka and the Chocolate Factory". We planned on using the printer to produce our own "golden tickets" for entry. What great ideas!!!

I am a big fan!!!
